WORK EXPERIENCE

Freelance   FEB 2017 - PRESENT
Front-End Web Developer

Designed and developed wedding website for an engaged couple who wanted to generate excitement for their special day and link any friends and family to their registry to help fill their home

Designing/developing personal websites for anyone who's in need of one, like an up and coming actor looking to get his face on the internet and launch is personal brand.

FanCompass   OCT 2015 - PRESENT
Lead Designer

Led and implemented ground-up design and branding development for franchise partner platforms in the NBA, NFL, NCAA, English Premier League, MLS, and MiLB

Developed brand guidelines and style guides for sponsorship and marketing activation - assets developed assisted in closing 5MM in sponsorship sales for teams

Worked with C-Level management to develop and design investment materials and company core identity

Design product upgrades meant to improve existing technology, working with product and engineering teams from initial concept and wireframes to final design

Teak   MAY 2013 - OCT 2015
Digital Production Artist +
Jr. Interactive Designer

Headed production and design of all creative assets for major, two-year account from concept and templates to final deliverables, while providing miscellaneous design support for various projects (both in-house and external)

Served as website and blog admin for multiple clients - managed, created, and posted content; edited hard code to ensure brand integrity across multiple channels

Worked directly with lead developer on website migration and asset audit. Managed content uploads using WordPress CMS. Performed QA on both in-house and client web applications
